

German Society of Tropical Paediatrics and International Child Health (GTP) e.V.

The GTP (previously ATP) was founded in 1983 and has been registered as a charity organization since 2003. It closely collaborates with the German Society for Child and Adolescent Health (Deutsche Gesellschaft für Kinder- und Jugendmedizin e.V.) and cooperates with various national and international organizations dealing with issues of international child and adolescent health in countries with limited resources.

The society is engaged in research, teaching and clinical projects. We furthermore facilitate and encourage national and international networking and development of projects between medical professionals and institutions.

Membership

If you are interested in becoming a GTP member please apply online and benefit from the reduced course fee.

→ globalchildhealth.de

Intensive Course on Tropical Paediatrics & Global Child Health

Jan 27 – Jan 31, 2020
Schloss Rauischholzhausen
near Gießen (Germany)

→ globalchildhealth.de

General Information

 **Date:** Jan 27 – Jan 31, 2020
Check-In: Jan 26, from 5 pm

 **Venue:** Schloss Rauischholzhausen
Schloßpark 1, 35085 Ebsdorfergrund

 **Course Language:** English

Target Group

This course is designed for medical professionals of all specialties interested in international child health focusing on countries with limited resources. We prepare participants to perform in different social, cultural and political contexts and to deliver adequate care in resource limited settings.

Doctors registered in Germany are eligible to receive credits (Fortbildungspunkte) for this course.

Content and Lecturers

We present updates on recent global data regarding international child health as well as on typical paediatric diseases in various geographic regions worldwide. Furthermore, political challenges in international developmental work are addressed. The theoretical knowledge acquired during the lectures is directly applied in practical group sessions.

The entire course is taught by international medical professionals with working experience in a variety of projects and countries. Theoretical content is underlined by specific and personal practical examples from the field.

We sponsor participation of several doctors in training from various countries with limited resources in order to enable direct exchange of work experience during the course.

Venue

We are proud to be hosting our Intensive Course on Tropical Paediatrics and Global Child Health at the castle «Schloss Rauischholzhausen», a historical site, conference center of the University of Gießen and an unique and yet reasonably priced venue.

The castle offers numerous seminar rooms of different sizes and a main lecture hall. It is well suited for teaching and learning in small interactive group sessions.

Seminars and accommodation are allocated at the same venue for closer interaction. Participants will be lodged in single or double bedrooms from Sunday night until Friday morning with all meals included. The beautiful surroundings of the castle are perfect for relaxing walks or some morning work-out.

Announcement

The **GTP Annual Conference on „Gender aspects of Global Child Health“** will take place from Jan 24 – 26, 2020 in Berlin, Germany.

Key Topics

All content focuses on resource limited settings:

- Global players, politics and programmes in global health.
- Health care systems.
- The role of the expatriate abroad.
- Organizing wards and departments or setting up projects.
- Infectious diseases, i. e. HIV/AIDS, tuberculosis, malaria.
- Psychosocial aspects in global child health.
- Research and data collection.
- Hospital and community based neonatology.
- Non-communicable diseases, i. e. malnutrition, endocrine diseases.
- Obstetrics and gynaecology.
- Laboratory work.
- Antibiotic stewardship.
- Practical procedures.
- Case presentations.
- Interactive group sessions on various topics.
- Intercultural communication.
- Highlights of other paediatric (sub-) specialties, i. e. surgery, dermatology, oncology.

Final Course Programme

The final course programme will be available on the GTP Website.
